COORDINATION CHEMISTRY REVIEWS

Contents

Preface 1

From simple building blocks to structures with increasing size and complexity
A. Müller and P. Kögerler 3

Phosphoraneiminato complexes of transition metals
K. Dehnicke, M. Krieger and W. Massa 19

Carbon dioxide and metal centres: from reactions inspired by nature to reactions in compressed carbon dioxide as solvent
D. Walther, M. Ruben and S. Rau 67

Homogeneous photo catalysis by transition metal complexes
H. Hennig 101

Alkylcycloarsoxanes and alkylcycloarsathianes—ambidentate macrocyclic ligands of variable metal-mediated ring size
W.S. Sheldrick and I.M. Müller 125

Reactions of β-functional phenyl isocyanides
M. Tamm and F.E. Hahn 175

Structural and functional studies on model compounds of purple acid phosphatases and catechol oxidases
R. Than, A.A. Feldmann and B. Krebs 211

Bioinorganic models for the catalytic cooperation of metal ions and functional groups in nuclease and peptidase enzymes
R. Krämer 243

Impact of Cisplatin on the recent development of Pt coordination chemistry: a case study
B. Lippert 263

The coordination chemistry of vanadium as related to its biological functions
D. Rehder 297

Coordination compounds of pteridine, alloxazine and flavin ligands: structures and properties
W. Kaim, B. Schwederski, O. Heilmann and F.M. Hornung 323

Strains and stresses in coordination compounds
P. Comba 343

Mechanistic studies in coordination chemistry
R. van Eldik 373

Author Index 411

Subject Index 413

The table of contents of *Coordination Chemistry Reviews* is included in ESTOC – Elsevier Science Tables of Contents service — which can be accessed on the World Wide Web at the following URLS: http://www.elsevier.nl/locate/estoc or http://www.elsevier.com/locate/estoc
